

Rabbit vaccination chart

5 – 6 weeks

- RVHD (both strains)
- Myxomatosis

10 – 14 weeks

Your vet will advise exactly if/when your rabbit needs their second dose.

- RVHD (both strains)
- Myxomatosis

Once a year

- RVHD (both strains)
- Myxomatosis

Most rabbits will be vaccinated following this timetable, but some rabbits need a custom schedule. Your vet will let you know if this is the case for your rabbits.
